iMOW® RELEASE NOTES

Here you will find all information about published updates of the iMOW® function software in the future. The functional scope of the delivery state is described in the operating manual. This document is updated on an ongoing basis.

6.4.11   06.2023

Functions:

Expansion of the mobile radio standards used to optimize connectivity.

Fixes:

The reset conditions for the battery temperature message have been optimized.

During the nightly restart routine, a stop button message erroneously appeared. This bug has been fixed.

In rare cases, the iMOW® stopped at the edge. This error is prevented by changing the program sequence.
